

Newcomer Area for Space Business

Exhibition Area for Companies Looking to Enter the Space Industry

Eligibility: Companies with no prior direct business experience in the space industry

Why Now? The Space Industry Opportunity:

As the market expands rapidly, the space sector is increasingly seeking innovative technologies from other industries. Following the designation of satellite and rocket components as “Specified Critical Materials” in 2025, technologies that can help strengthen Japan’s domestic supply chain are attracting increasing attention.

Target Exhibit Products:

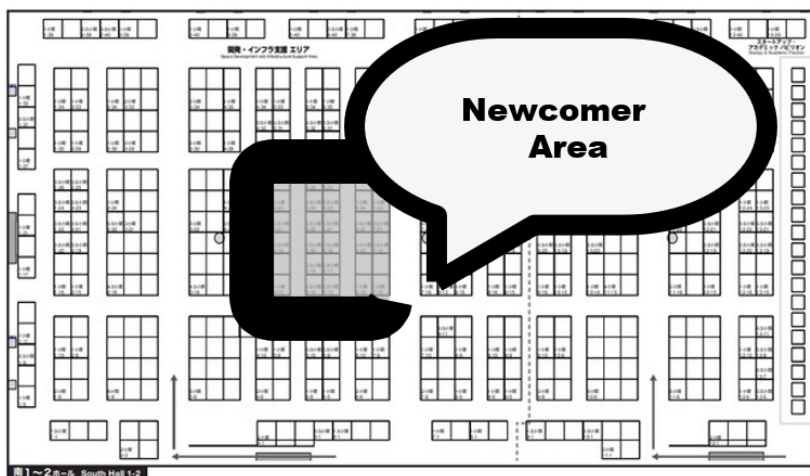

- Mechanical Components & Machining Technology
- Electronic Components & Power Supplies
- Testing, Measuring Instruments & Sensors
- Materials & Advanced Materials
- Machine Tools & Equipment ...and more

Expected Visitors:

- Executives & Business Owners
- Engineers
- Professionals in Design, R&D, Manufacturing, Analysis & QA...and more

Key Benefits:

- Connect directly with key players in the space industry.
- Get direct feedback on whether your technology can be applied to space projects.
- Raise industry awareness while conducting business meetings and consultations for market entry.

Dates:

May 12 (Wed) – 14 (Fri), 2027

Venue:

Tokyo Big Sight, Japan

Held inside:

SPEXA – Space Business Expo -
